

ROLE PROFILE - JUNIOR WEB UI SOFTWARE DEVELOPER

Employees and applications; consumers and products; people and devices – we bring them together and help them do business, digitally and securely.

At Pirean, we improve customer engagement, enable workforce productivity and secure access for millions of users every day.

We are looking for a Junior Web UI Software Developer to join our team in Canary Wharf.

Overview of the Role

As a UI Developer, you will be part of an expert team responsible for the User Interface implementation across various projects. Our team needs to code to a very high standard with developers having expert knowledge of creating high-performance applications in HTML5, Less/Sass and AngularJS.

You will be working on Single-Page Applications in AngularJS taking high level designs and implementing them in HTML5, CSS3 and AngularJS, together with developing responsive applications targeting multiple screen dimensions, multiple browsers and multiple devices.

You will work closely with an established UX design team to develop effective and usable design solutions. You will then be implementing these designs either as prototypes, as integrations in our existing web applications, or as fully deployed applications.

Should Have

- Experience of building Single-Page Applications in AngularJS.
- CSS base knowledge: including selectors, transitions, different box models and display styles.
- HTML base knowledge: including new HTML5 features, best practices and WAI-ARIA tags.
- Knowledge of developing responsive applications targeting multiple screen dimensions, multiple browsers and multiple devices.
- Asynchronous operations and patterns to deal with those

Nice to Have

- Client – Server communication, REST services, real time communication using web sockets, cross origin policy
- Practical knowledge of CSS pre-processors like Less and Sass
- Practical knowledge of popular development tools like Npm, Grunt, Gulp and Bower
- Masters or Degree in a technical discipline or equivalent
- Knowledge of working with UX teams and designers
- Familiarity with an Agile approach to development

Benefits

- Work on application solutions servicing millions of users around the world
- Unlimited potential for growth
- Great location, flexible office hours
- Health benefits
- Annual bonus
