

## ROLE PROFILE - MID-LEVEL AUTOMATION TESTER

As leaders in Identity and Access Management, Pirean creates user experiences for some of the world's leading companies. We ensure workforces have access to the applications they need at anytime from anywhere.

We're looking for a mid-level Automation Tester to become part of our team in London's Canary Wharf.

As an experienced Automation Tester, you will develop test scripts, execute test cases, maintain reports of test results, and work closely with developers to resolve discrepancies. This position requires an individual who is creative, team-oriented, a quick learner and driven to produce results.

Working with the Test Team, you'll encourage testing to be there from design stage onwards. You'll carry out functional testing, Smoke as well as exploratory and end-to-end regression testing for releases.

### Accountabilities

- You will prepare automation test scripts in Java using Cucumber feature files and Step Definitions fully utilizing capabilities of Selenium WebDriver with Page Object Models.
- Execute automation script, log defects and maintain test report.
- Knowledge to write good test cases using Cucumber feature files in BDD format.
- Ownership of the bug testing life cycle from ticket creation through to confirmation that the bug is resolved.
- Deliver quality and timely manual testing throughout the software development cycle i.e. from design stage onwards
- Carry out the testing of our web and mobile applications using an array of test methods including functional, black-box, Smoke, exploratory and regression testing.
- Participation in the technology team discussions and events including all stand-up meetings.
- Any other duties as reasonably required by the role to contribute to Pirean both as a team player and individual expert.

### Skills

- Ability to test an application from a wide range of perspective
- Hands-on Experience in using different test methods and their practical usage
- Good understanding of the software development lifecycle
- Any scripting language experience in a software testing environment
- Proven automation experience in Java, Selenium Web Driver and Cucumber Feature File and Step Definition is required
- Fluent/high level of both written and spoken English
- Experience with using Assembla or any bug tracking software e.g. Jira
- Experience with distributed version control like Git or Mercurial
- Knowledge with Continuous Integration tools (Jenkins, Team City, or Hudson)

### Job Type

Permanent

### Start Date

a.s.a.p.

### Salary

£30,000 per annum

### Location

Canary Wharf, London

### Restrictions

Must have permits / Visa to work in the UK

Must be fluent in English (written and verbal)

### Application Closing Date

24<sup>th</sup> May 2017

## ROLE PROFILE - MID-LEVEL AUTOMATION TESTER

### Behaviours

- Engaged with the Pirean software team and enjoy working with them to get the best for both clients and Pirean
- Enthusiastic about own role, team, and business, generally has a positive style and approach
- Good problem solver, likes to come up with good fit solutions rather than getting 'lost' in the detail
- Has an organized approach, knows how to prioritize own work load
- Calm approach to all aspects of the role
- Good communicator, strong verbal, and written skills
- Masters or Degree in a technical discipline or equivalent e.g. information technology, Computer Science etc.
- Fluent/high level of both written and spoken English

### Benefits

- Salary: £30,000 per annum
- Discretionary Annual bonus after qualifying period
- Healthcare after qualifying period
