

ROLE PROFILE - SENIOR CONSULTANT

Employees and applications; consumers and products; people and devices – we bring them together and help them do business, digitally and securely.

At Pirean, we improve customer engagement, enable workforce productivity and secure access for millions of users every day.

We are looking for a Senior Consultant to join our team in Canary Wharf.

Overview of the Role

A Senior Consultant advises clients on how to best use IT security products when attempting to meet their business objectives or overcome problems.

The Senior Consultant will provide advice and recommendations, based on expertise and experience, to address client needs. The individual may deal with one specialist subject area, or can be wide ranging and address strategic business issues. The individual may also include support for the implementation of any agreed solutions.

At this level (equivalent to Level 5 Consultancy Skills in the SFIA framework), the Senior Consultant takes responsibility for understanding client requirements, collecting data, delivering analysis and problem resolution. Identifies, evaluates and recommends options, implementing if required. The individual collaborates with, and facilitates stakeholder groups, as part of formal or informal consultancy agreements. They seek to fully address client needs, enhancing the capabilities and effectiveness of client personnel, by ensuring that proposed solutions are properly understood and appropriately exploited.

Key Responsibilities

The responsibilities for this role will include (but are not limited to):

- Meeting with clients to determine requirements and defining project scope
- Clarifying a client's system specifications, understanding their work practices and the nature of their business
- Travelling to customer sites
- Presenting solutions in written or oral reports
- Defining software, hardware and network requirements
- Designing, developing, testing, installing and monitoring new systems
- Planning timescales and the resources needed
- Helping clients with change-management activities
- Liaising with staff at all levels of a client organisation
- Preparing documentation and presenting progress reports to customers
- Organising training for users and other consultants
- Identifying potential clients and building and maintaining contacts
- Being involved in sales and support, and where appropriate, maintaining contact with client organisations
- Mentoring other consultants and team leadership activities
- Be the primary "technical" contact for a variety of customers (likely smaller engagements)
