

ROLE PROFILE - SENIOR IDENTITY AND ACCESS MANAGEMENT CONSULTANT

Employees and applications; consumers and products; people and devices - we bring them together and help them do business, digitally and securely.

At Pirean, we improve customer engagement, enable workforce productivity and secure access for millions of users every day.

We're looking for Senior Identity and Access Management Consultants to design and deliver excellent IAM solutions (IBM, CyberArk, Pirean, Sailpoint, etc.) to a range of major private & public-sector clients.

Overview of the Role

Candidates will ideally be CISSP Certified and have a broad IAM / Security technical background. You will be equally able to advise customers on effective solutions to their IAM challenges, as well as mentor other staff, and deliver high quality technical solutions. It is expected that you will have experience of working in an IT consultancy, or have demonstrable experience in taking a leading role in designing end to end enterprise scale IAM solutions for FTSE250 companies, major Public-Sector Government Departments or NHS Trusts. As a result, you will be rewarded with a comprehensive package of remuneration and benefits, with the prospect of excellent career progression.

We are an equal opportunities employer and welcome applications from all suitably qualified persons.

Key Responsibilities

The responsibilities for this role will include (but are not limited to):

- forming effective working relationships with customer representatives;
- defining and clarifying a customer's requirements;
- designing, developing, testing, installing, and monitoring new systems;
- preparing documentation, presenting solutions in written or oral reports;
- being involved in pre-sales support, and where appropriate, maintaining contact with customer organisations;
- training and mentoring customer representatives, other consultants, and team leadership activities; and
- be the primary 'technical contact' for a variety of smaller engagements.

Technical Skills & Experience

Role holders will be expected to have a mix of the following skills and experience:

- Operating Systems (Linux, Windows); Scripting; Languages (Java, JavaScript);
- Working knowledge of some of the following tools:
 - IBM Security Identity Manager (ISIM)
 - IBM Identity Governance Intelligence (IGI)
 - IBM QRadar, Bigfix
 - CyberArk PIM
 - Sailpoint Identity Management Solutions
 - Microsoft Identity Manager
